

Press Release

“AUTOMATION AWARD 2019” FOR CARLO GAVAZZI’S IO-LINK SMART CONFIGURATOR SCTL55

During the SPS international exhibition held in Nuremberg, Carlo Gavazzi won first place in “System solutions” category.

Lainate, December 2019 - Carlo Gavazzi’s new IO-Link Smart configurator SCTL55, which has been available since February 2019, has been awarded the [elektro AUTOMATION Magazine’s](#) Automation Award 2019.

On Thursday December 5th, Francisco Garcia, Carlo Gavazzi GmbH Managing Director, received the prize at the publishing house of the Konradin media group.

The majority of voters at the last SPS fair in Nuremberg, voted for our new portable, self-powered and user-friendly smart configurator for IO-Link sensors.

The SCTL55 smart testing and programming device for IO-Link sensors can work independently of a PC and software as a standalone device, allowing easy and quick access to sensor data so as to manage sensor parameters anywhere at any time.

The SCTL55 automatically connects, via Wi-Fi, to the IODD finder database, that includes all IO-Link sensors available on the market. As a result users can easily manage and improve the production processes and predictive maintenance by visualizing sensor’s parameters in a snapshot.
