

Press Release

PSS – PRODUCT SOLUTION SEARCH THE APP FOR THE MONITORING RELAYS SELECTION

How to immediately get the right item and the related technical specifications for the ideal monitoring relay according to your specific need.

Lainate, July 2021 - Carlo Gavazzi Automation, the international electronics group with activities in the design, manufacture and marketing of electronic equipment, today presents the new selection App for our range of monitoring relays.

Very often, users have a clear picture about what they need from a monitoring relay (e.g.: an overcurrent relay for 12 A) but they struggle to equate how their need is translated into the supplier's item.

Some search tools are complex as they follow the rules in the mind of the suppliers, or they just provide a long list of items among which the user must search to find the appropriate product.

The PSS App aims at closing the gap between the need and the product by speaking the language of the user (8 languages available), having filters with the user's categories (as measured current) and immediately providing the best solution for the inserted criteria, with the datasheet just one click away.

This App works on all platforms like PC, Android and iOS smartphones and tablets.

"The PSS App is simple, smooth and intuitive, making it easier to find the best option," Francesco Vedana, International Product Manager, says. "Starting from the selection of the main function, a list of parameters and additional numerical fields to be filled in to reach the ideal relay according to the user's requirements."

Specifically developed to simplify and enhance the user experience, the PSS App makes the purchase smoother and more immediate.

Main technical features

- Available for our range of monitoring relays
- It works on PC, Android and iOS devices
- 8 languages available (English, German, French, Chinese, Spanish, Danish, Swedish, Italian)
- Immediately returns item number, description, picture and datasheet of the best fit for the user's search

ABOUT CARLO GAVAZZI AUTOMATION

Carlo Gavazzi Automation is an international electronics group with activities in the design, manufacture and marketing of electronic equipment targeted at the global markets of industrial and building automation.

Carlo Gavazzi Automation provides customers with technologically innovative, high quality and competitive solutions, in compliance with their requirements and expectations through its 22 National Sales Companies in Europe, the Americas and Asia & Pacific, operating with its production sites in Denmark, Italy, Malta, Lithuania and China.
